DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 12-20, drawn to an interconnect structure, classified in class 257, subclass 774.
- II. Claims 1-11, drawn to a method of fabricating an interconnect structure, classified in class 438, subclass 15+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, instead of forming a dense etch stop layer on a surface of a substrate, said dense etch layer is capable of protecting underlying metallurgy during a subsequent etching step, it can be before the etching step by a mechanical means.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship
